BGP Peach Pit
Data Sheet

- Peach Pit: BGP
- Target:
- Supported Platforms: Windows, Linux, OS X

The Border Gateway Protocol is an inter-autonomous system routing protocol. BGP exchanges routing and distance-vector information between autonomous systems on the Internet.

Specification	Title
RFC4271	A Border Gateway Protocol 4
draft-ietf-idr-dynamic-cap-14	Dynamic Capability for BGP-4
RFC4360	BGP Extended Communities Attribute
RFC4456	BGP Route Reflection
RFC4724	Graceful Restart Mechanism
RFC6793	BGP Support for Four-Octet Autonomous System (AS) Number Space
RFC5291	Outbound Route Filtering Capability for BGP-4
RFC2918	Route Refresh Capability for BGP-4
RFC1997	BGP Communities Attribute
RFC2858	Multiprotocol Extensions for BGP-4
