Data Sheet

- Peach Pit: CoAP
- Target: Client, Server
- Supported Platforms: Windows, Linux, OS X

Constrained Application Protocol (CoAP) is a networking transfer protocol for use with constrained nodes and networks. Designed to work with simple electronics having low overhead and multicast support, CoAP uses include Internet of Things devices and embedded devices.

Specifications

Specification	Title
RFC7252	The Constrained Application Protocol (CoAP)

Use Cases

Messages	Specification
CoAP Protocol	RFC7252
Observe	draft-ietf-core-observe-16
Block-Wise Transfers	draft-ietf-core-block-17
