DNS Peach Pit
Data Sheet

- Peach Pit: DNS
- Target: Client (UDP and TCP), Server (UDP and TCP)
- Supported Platforms: Windows, Linux and OS X
- Protocol: UDP, TCP

Domain Name System (DNS) is a hierarchical naming system for network resources.

In addition to testing the client and the server, this Pit provides fuzzing using either of two network layers using UDP or TCP.

Specifications

Specification	Title
RFC1035	DOMAIN NAMES - IMPLEMENTATION AND SPECIFICATION
RFC6891	Extension Mechanisms for DNS (EDNS(0))
