Ethernet Peach Pit
Data Sheet

- Peach Pit: Ethernet
- Target: Broadcast
- Supported Platforms: Windows, Linux, OS X

An Ethernet Frame is a link layer data packet as described in IEEE 802.3. It encapsulates all the layers above it.

This is a simple protocol; this Pit would not be used alone, but would likely be used to construct encapsulated protocol pits.

Specifications

Specification	Title
802.3	Ethernet

Use Cases

Messages	Specification
Ethernet Frame	802.3 Section 3.1.1

Supported Features	Specification
Address Fields	802.3 Section 3.2.3
Length/Type Fields (Partial)	802.3 Section 3.2.6
MAC Client Data field	802.3 Section 3.2.7
