- Target: Client, Server
- Supported Platforms: Windows, Linux, OS X

The Lightweight Directory Access Protocol (LDAP) is an application protocol to access and maintain distributed directory information services over an Internet Protocol (IP) network. The directory information can consist of contacts, personal information, group aliases, certificates, printer addresses, or any directory-like information.

## Specifications

Specification	Title
RFC4511	Lightweight Directory Access Protocol (LDAP) :

## Use Cases

Messages	Specification
Bind Operation	RFC4511 4.2
Unbind Operation	RFC4511 4.3
Search Operation	RFC4511 4.5
Add Operation	RFC4511 4.7
Delete Operation	RFC4511 4.8
Compare Opeartion	RFC4511 4.10
Extended Operation	RFC4511 4.12
