

Downloading Peach API Security — AWS Marketplace

Introduction

This document describes how to download Peach API Security directly from the AWS Marketplace. If you purchased directly from Peach Fuzzer or a Peach Fuzzer Partner, view our [Direct Download Guide](#). For more information on purchasing options, see our [How to Purchase Guide](#). Please email any comments and suggestions to support@peachfuzzer.com.

Peach API Security performs security testing of Web Services/APIs. Testing includes OWASP Top-10 and PCI 6.5 security checks as well as fuzz testing. Designed to integrate into modern development models such as Agile and continuous integration (CI) cycles, integrations with CI systems enable the product to be run automatically during daily builds. Peach API Security is intended to be integrated into engineering groups with minimal alterations to existing developer workflows.

Peach API Security is distributed as an Amazon Machine Image (AMI) on a per-instance basis. The installation process consists of finding the product on the API Marketplace and performing some initial configuration steps.

Access AWS Marketplace

Peach API Security can be purchased directly from the AWS Marketplace. All billing for licensing and hosting the product are handled directly by AWS.

Navigate to the [Peach API Security](#) product page or search for “Peach API Security” on the [AWS Marketplace](#) to locate the product. If you do not already have an AWS Marketplace account, you will be prompted to sign up for one prior to purchasing Peach API Security.

Select the continue button and walk through the Amazon purchase process. Select the most recent version of Peach API Security, the region where AWS will host your AMI, the type of EC2 instance to run, and IP addresses you want to be able to access your software.

Deploy AMI Instance

The AWS Marketplace [help documentation](#) will guide you through any additional deployment steps of your AMI. Peach Fuzzer does not support the deployment of Peach API Security for AWS Marketplace customers.

Questions

Once you have downloaded the software, you can access the user guide by selecting help in the upper right hand corner of the web UI.

If you have Peach API Security support questions, please reach out to us at support@peachfuzzer.com.
